

Successful First JAZZ Cap® Surgeries in the US

- First procedures in the US with JAZZ Cap®, the proprietary solution addressing a potential market of USD2.5 billion ¹
- Secure and protect pedicle screws in poor quality bone

Bordeaux, Boston, June 6, 2019 – 08:00 am CEST - IMPLANET (Euronext Growth: ALIMP, FR0010458729, eligible for PEA-PME equity savings plans), a medical technology company specializing in vertebral and knee surgery implants, is announcing the successful results of the first surgeries using JAZZ Cap® in the United States.

Following 510(k) clearance in March 2019, the first JAZZ Cap® procedures have been successfully completed by fellowship trained orthopaedic spine surgeon Chi Lim, MD in Spartanburg, SC.

JAZZ Cap® is a unique and complete proprietary solution for securing screws in poor quality bone – a factor in 10% to 30% of vertebral fusion cases in adult patients².

Chi Lim, MD of Carolina Orthopaedic & Neurosurgical Associates, said: *“I have been using Implanet’s Jazz Band implants with excellent results in complex adult deformity indications. The arrival of JAZZ Cap® as part of the Implanet band range is a major breakthrough in securing and protecting screws in poor quality bone. This new implant was easy to use during the first surgeries and has provided encouraging early post-operative clinical results. We will now follow these patients to confirm the long term outcomes. In my opinion, JAZZ Cap® will quickly become an essential implant for spine surgeons.”*

Ludovic Lastennet, Implanet’s Chief Executive Officer, commented: *“I am excited to have personally attended Dr. Lim’s initial Jazz Cap® procedures. The successful completion of these first surgeries represent a significant step for the development of our company, opening a unique opportunity in the US degenerative spine market. We anticipate JAZZ Cap® will become a significant alternative to cement augmented pedicle screws. Full market release of the technology is scheduled for September, with a global presentation at the North American Spine Society Annual Meeting in Chicago.”*

About Implanet

Founded in 2007, Implanet is a medical technology company that manufactures high-quality implants for orthopedic surgery. Its flagship product, the Jazz® latest-generation implant, aims to treat spinal pathologies requiring vertebral fusion surgery. Implanet's tried-and-tested orthopedic platform, which is based on perfect control over the traceability of its products, provides it with a proven ability to promote this innovation. Protected by four families of international patents, JAZZ® has obtained 510(k) regulatory clearance from the Food and Drug Administration (FDA) in the United States and the CE mark. Implanet employs 38 staff and recorded 2018 sales of €6.7 million. For further information, please visit www.implanet.com. Based near Bordeaux in France, Implanet established a US subsidiary in Boston in 2013. Implanet is listed on Euronext™ Growth market in Paris. The Company would like to remind that the table for monitoring the equity line (OCA, OCAPI, BSA) and the number of shares outstanding, is available on its website: <http://www.implanet-invest.com/suivi-des-actions-80>
